Profile

Computer Science graduate with First Class Honours from De Montfort University, now completing an MSc in Data Analytics. Hands-on experience building, evaluating and deploying machine learning, NLP and full-stack data applications using Python, scikit-learn and Streamlit. Seeking a graduate or junior data analyst / data science role where analytical and software skills turn data into measurable decisions.

Education

MSc Data Analytics *Sep 2025 - Present*

De Montfort University, Leicester, UK

BSc (Hons) Computer Science - First Class Honours *Jan 2023 - Aug 2025*

De Montfort University, Leicester, UK

Higher Secondary Education (Class XII) *Gujarat Board, India*

Mathematics, Physics, Chemistry

Technical Skills

Languages & Querying: Python, SQL, JavaScript (ES6+)

Data & Machine Learning: pandas, scikit-learn, NLP (TF-IDF), Matplotlib, Power BI, Apache Spark, Hadoop

Web Development: React.js, Node.js, Express.js, MongoDB, HTML5, CSS3, Tailwind CSS, REST APIs, JWT

Tools & Deployment: Git, GitHub, Streamlit, Vercel, Render, Agile

Projects

UK Consumer Credit & Debt Trends Analysis *PostgreSQL, SQL, Power BI, Python*

- Built an end-to-end analytics pipeline on **136 months of Bank of England data**, from Python data cleaning to a PostgreSQL database and an interactive Power BI dashboard.
- Wrote SQL analysis using **window functions (LAG), GROUP BY and CASE logic** to quantify year-over-year debt growth, surfacing a 6% contraction during 2021 lockdowns and a 6% rebound by 2023 amid the cost-of-living crisis.
- Designed a 3-visual Power BI dashboard connected live to PostgreSQL, presenting £82bn (48%) debt growth across three economic eras.

[GitHub](#)

Mental Health Crisis Detector *Python, scikit-learn, Streamlit*

- Built an NLP text-classification model (TF-IDF + Logistic Regression) that sorts free-text posts into 7 mental-health categories at **76.12% accuracy**, trained on 51,000+ labelled posts.
- Deployed an interactive Streamlit web app returning live predictions with per-class confidence scores.

[Live demo](#) [GitHub](#)

International Cricket Performance Analyser *Python, Pandas, Streamlit*

- Processed **3.7M ball-by-ball deliveries** across 6,664 international matches (Cricsheet) into clean batting, bowling and team datasets.
- Designed a **custom Performance Index from scratch** to rank 1,155 batters and 824 bowlers across Test, ODI and T20 formats.
- Built a 5-page interactive dashboard: overview, batting, bowling, team comparison and player search.

[Live demo](#) [GitHub](#)

Prescripto - Doctor Appointment System *MERN Stack*

- Developed a full-stack booking application with role-based dashboards for patients, doctors and administrators.
- Implemented JWT authentication and integrated the Razorpay payment gateway; used Cloudinary for media storage.
- Deployed across Vercel (frontend and admin) and Render (backend) with MongoDB Atlas.

Experience

Retail Assistant - De Montfort Students' Union (Merchandise) *Sep 2025 - Present*

- Served customers, handled till transactions, restocked merchandise and supported store operations during campus events.

Bar & Event Supervisor - De Montfort Students' Union *Sep 2024 - Sep 2025*

- Supervised student staff and daily operations in a fast-paced, high-footfall venue; resolved issues under pressure and supported event delivery end to end.

Team Leader - Scraftoft Valley Club, Leicester *Jun 2023 - Sep 2024*

- Led and scheduled team activities, delegating responsibilities to keep tasks on time.
- Handled member concerns professionally, strengthening communication and conflict-resolution skills.

Certificates

British Airways Data Science Job Simulation - Forage *June 2025*

- Scraped and analysed customer review data and built a predictive model of buying behaviour.

C++ Programming - Basic to Intermediate

Languages

English, Hindi, Gujarati
